COMMENTS :

If you want it to fly, keep it light. Remember Arrowhead I? Higher aspect ratio with less taper should help stability. Build in slight amount of washout into last 2 inches of wingtip. Wing is built on - no disassembly. Boom should be strengthened. No Dihedral. Optional wheels and parts. 1 1/2 Spinner. 6-3 prop. Use Futaba gear. Looks good with fillets and fairings. Should fly plenty fast. Should be easy to launch. Study flight characteristics for Arrowhead III
